Project Name: 2D House Design.

10 layers have been used in this project.

Explain Uses tools:

1) Line: The line has been used the most in this design, the part of the roof you see above has been done through the line running, and also the whole structure has been done through the line tools.

2) Circle: Two circles have been taken on either side of the door and given a gradient color.

3) Rectangle: I have design windows shots mainly through rectangles and I have used gradient color in it.

4) Trim: We have made a great contribution to this design by removing some parts through these tools.

5) Copy: We have worked with copy tools on one side and the lines on the other side.

6) Erase: We have been able to easily remove the wrong designs

7) Bricks Design:

We have given some formats of house design bricks. The way it is basically made is given below:

Command + HATCH+ Enter

Then select Bricks Format.

Thank You
